

# Site Survey for Digital Services

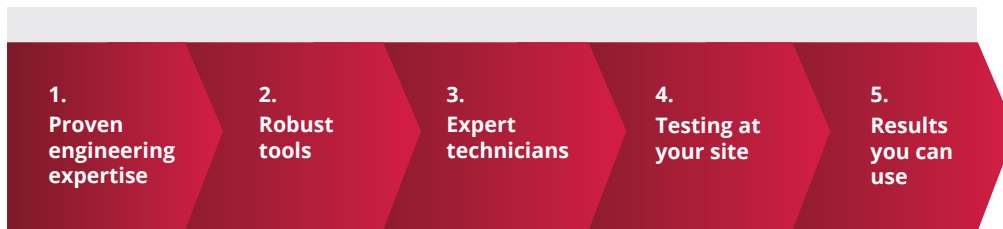

Considering a move to a VoIP solution, but you're not sure your business is ready? BullsEye Telecom's Site Survey for Digital Services is a comprehensive, cost-effective way to see exactly how your network is performing.

We'll assess your assets and help you make an informed decision about what's best for your business.

## The BullsEye Way

Without the right process and people, it's hard to know exactly what's in your network. We provide:

Backed by an outstanding engineering team and precise tools, our technician will visit your site and perform several tests assessing VoIP readiness. We'll provide an easy-to-understand report and **a clear prescription of your next steps!**

### SITE SURVEY ASSESSMENTS

- ✓ Broadband connection including packet loss and jitter
- ✓ Mean Opinion Score (MOS)
- ✓ Firewall and assessment of ports
- ✓ Speed review for VoIP traffic (including packet loss and jitter, both upstream and downstream)
- ✓ Speed review for Internet traffic
- ✓ Line inventory (including lines not in use)
- ✓ Inside wiring

## The BullsEye Difference

Other providers offer VoIP readiness testing, but our Site Survey for Digital Services stands apart.

Our Technical Services Team completely evaluates your network

Easy-to-digest, visual report showing issues that need attention

Excellent value for your investment

### ADVANTAGES FOR YOU

- Fully managed and implemented by BullsEye
- Information in hand to make any necessary changes
- Smooth and easy access to BullsEye's team to implement upgrades
- Flexibility to choose any vendor for your work
